UCL FUCaM Mons

2020 – 2023

Bachelor in Industrial Engineering

HELHA Mons

CERTIFICATIONS

Qlik Sense Data Architect (2026)

TimeXtender TX-200 (2026)

PERSONAL PROJECTS

ORAPACE · orapace.app

Since 2026

A web app (PWA) for runners and trail runners: training dashboard (Garmin/Coros sync), messaging, community features (chat, leaderboards, territory capture) and live race tracking, built with Claude Code and hosted on Render with a Neon database. Also building other everyday apps the same way (staying in touch with family and friends, day tracking).

EXPERIENCE

Data Integration Consultant

Since 02/2026

Toyota Motor Europe (via Beyond Data Group)

Contributing to a data integration project: building ETL flows in Talend, with execution scheduling and logging to ensure reliable, traceable and well-monitored data workflows.

Talend ETL

BI Consultant · Qlik to TimeXtender Migration

Since 11/2025

Brussels Formation (via Beyond Data Group)

Leading the migration of the analytics environment from Qlik to TimeXtender, with data historization management. Designed the data model and fed existing Qlik reports with the right historical data versions for a seamless transition.

TimeXtender Qlik Sense SSMS SQL Server

BI Consultant · Jira Ticketing System

10/2025 – 01/2026

Brussels Fiscalité (via Beyond Data Group)

Built an analytical report on Jira tickets using Qlik Sense's REST APIs. Adapted the API calls when Jira migrated to its new architecture, keeping support team tracking uninterrupted.

Qlik Sense REST API

BI Consultant · Bilingual FAQ Application

09/2025 – 11/2025

Brussels Fiscalité (via Beyond Data Group)

Designed a bilingual FAQ app (FR/NL) as a Qlik Sense report with Vizzlib writeback, letting teams consult and update content directly from the interface.

Qlik Sense

Vizzlib

Data Insight Consultant · Internship

01/2025 – 06/2025

Pairi Daiza (via Beyond Data Group)

Built a predictive visitor-flow and crowd-management optimization algorithm, combining data from Microsoft Fabric and external APIs. Tested several machine learning models and visualized results in Power BI to anticipate peak attendance and improve resource allocation.
